*Each button corresponds to one line  
 Button can be set as Speed Dials or Extra Lines*

**Switch Buttons**  
*Each button corresponds to one page of 20 line keys  
 Giving you a total of 40 extra lines or speed dials*

### EXP 40 Sidecar Features

- The EXP 40 Sidecar is designed to improve the functional capability of the Commander T46G IP Phone
- It features a large graphic LCD screen
- 2 pages of 20 programmable keys each (total 40), which can be programmed as various features, which include **Busy Lamp Field, Speed Dialling, Conference, Transfer**
- Programmable keys, with a dual-colour LED display indicating line appearance such as **Green = available or Red = line busy**
- The Commander EXP40 is ideal for receptionists, administrative assistants, call centre agents, power-users, and executives who need to monitor and manage a large volume of calls on a regular basis.
- Up to six expansion modules can be daisy-chained to a single **T46G** IP phone

### Basic Configurations

The **EXP40** supports 40 programmable keys in two separate screen pages. Each page displays 20 keys.

#### To assign a Feature to a DDS Key via the phone interface:

- Press **1** or **2** to switch between the two pages and use your desired programmable key.
- Press the desired DSS key for about 5 seconds, the phone LCD screen will prompt the settings of this key.

*Programmable Features and Speed Dials can also be configured via an online interface*
